# AHEAD OF THE COMPETITION THROUGH MORE INTELLIGENT CONNECTIVITY.

### Larger Selection
Various solutions to meet various customer needs.

### Apps by Experts
Concentrated industry know-how by Fleetboard, Daimler and their top-class partners.

### Available at One Stop
The widest range of solutions on a single platform.

### Less Hardware
More benefits with less hardware by using one end device in the vehicle.

### Simple Administration
Convenient distribution of apps to the vehicles from the central office and over the air.
### Beyond Brands
Apps can be applied beyond all brands.*

*Available in vehicles with corresponding vehicle electronic system e.g. standardized FMS interface.

# FROM THE APP IDEA TO THE VEHICLE — HOW IT WORKS.

The Fleetboard Developer Portal offers interested partners and independent developers all required information regarding the development, the distribution, and sale of apps. Various technical documentation, an SDK, and a guided submission process help to integrate apps easily into the Fleetboard Store.

Fleetboard customers can install apps from the Fleetboard Store on individual vehicles or all vehicles of the fleet. Subsequently, they are available to the drivers on the DispoPilot.guides assembled in the vehicles. The installed apps not only improve everyday life for drivers, they also increase the efficiency of the entire fleet through intelligent connectivity.
